

2019 Central Illinois Regional – Packing Checklist

Teams – As you make final preparations to attend the CIR, please remember to bring the following:

- Your robot and robot lock-up form in the same vehicle. Be sure to tape your lock-up form securely to the outside of your bag during load-in, so inspectors can have you ready to unbag / resolve issues on Thursday morning
- Bill of Material – you may want to print a copy to speed up the inspection process, since there are new B.O.M. rules this year. For those loading in on Wednesday, the B.O.M. may be turned in to the Lead Robot Inspector.
- Team roster to hand in at registration Thursday morning with consent and release process either completed on line or with paper form brought to the event
- Robot cart
- Driver's station and laptop(s)
- Batteries and chargers
- Power strips
- Safety glasses for each team member on their person – don't pack them in your pit stuff or you may be delayed setting up your pit.
- Your tools, supplies, materials, pit decorations, awards, sponsor signs, spare parts, and up to 30 lbs. of withholding

- Game pieces for practice – there will be a small practice field with the team design plywood field element that is sent by FIRST. The layout will not be the same as the competition field due to space constraints.
- First aid kit and battery clean-up kit
- Team flag
- Team mascot costume

Best regards,

Tim Koch

Central Illinois Regional Planning Committee Chairman
